Our home has a two car garage where the owners park nightly. Our one child care assistant will park in our driveway in the spot closest to our front entrance.

This will leave a total of three parking spaces in our driveway available.

Parents will be using the rear patio to enter and leave our property. Our parent handbook allows them to pick a time for drop off and pickup within our operating hours of 6:00am and 7:00pm. Parents will be required to follow the requested time and not spend more than 10 minutes in the facility unless they have a planned meeting with a care provider. These guidelines will help to insure that we maintain staggered drop off and pick up times and do not have parents parking on the street. Drop off and pickups will not be permitted from 12:00pm-130m during "nap time". This will also insure that our neighbors that come home from lunch will not experience an influx of traffic.

Item 9

City Planning Board

To The Board:

Dear Board,

I am trying to put up a car cover over my driveway to protect both my vehicles from ice, snow and bad storms with hail. It will also improve the appearance of the house. But it seems I run into glitches at every turn. I went to get a permit to stay legal, and it turns out I also need a Variance to do this job, another glitch. I have already had a vehicle damaged from 3 storms and feel it is time to protect what I cannot afford to replace, and improve the front of my house at the same time.

I was shocked when I saw all the extra money and paperwork that is involved, but I will comply as required, I want to stay legal. I am desperately asking you to let me have this job completed, before

The stormy season approaches, I can't do much about the rest of the winter, but this cover will be an asset for the future.

I thank the Board for it's time and hope you will help me with this matter.
